

RISING STAR AWARD (2023)

Robert Ristick – Seismic Specialist – Safe-T-Proof

A newcomer to the field of non-structural seismic damage mitigation, Robert has shown versatility and positive attitude during his short time at Safe-T-Proof.

Originally brought into to assist with the manufacturing of seismic bracing kits, he showed his skill in the specific and difficult task of creating components as specific by the International Code Council and to the rigorous standards of an audited process of manufacturing called "AC-10".

He then demonstrated acumen in offering field consultation to various California hospitals, assisting in the securing of essential equipment. Robert's impact to keeping businesses open following an earthquake is already being felt.

We are excited to see what the future holds for Robert and would like him to come up and accept his BICEPP Rising Star Award.
